ON-EAGLEWINGS GROUP

PLAN 1: MULTI-PAGE PUBLIC WEB PLATFORM ARCHITECTURE

Target Domain: on-eaglewingsgroup.com
Stack: Next.js 15 / TypeScript / Tailwind CSS
Regions: South Africa & Zimbabwe

Developer Directive: Build a production-grade multi-page web platform for ON-Eaglewings Group. Benchmarked against industry leaders WBHO and JUWI, this site requires dedicated sub-pages for SEO indexing, modular components, 3D/Framer Motion animations, and instant lead routing.

1. MULTI-PAGE ROUTE STRUCTURE

URL ROUTE	KEY COMPONENTS & CONTENT	SEO / PERFORMANCE
`/ (Home)`	Hero section with 3D particle canvas, "You Build, We Finish" slogan, quick-stats (20+ yrs), interactive division preview, flagship O.R. Tambo Airport showcase, and branch map.	OpenGraph tags, high-speed SSR, primary keyword target for SADC finishes.
`/about`	Company heritage (founded 20 years ago in South Africa, expansion into Harare, Zimbabwe), leadership principles, ISO quality standards, and corporate philosophy.	Corporate index, trust building for commercial contract tenders.
`/services/*`	Dedicated pages for all 9 divisions: Steel & Glass Balustrades, Pools, Steel Staircases, Decking, Waterproofing, Solar Energy, Roller Shutters, Garage Doors, Wall Skimming.	Targeted service keywords (e.g., "Commercial Solar SA", "Bitumen Tanking Harare").
`/projects`	Filterable architectural project showcase with high-res photos, load specs, location tags, and technical case study downloads.	Image optimization via `Next/Image`, fast gallery pagination.
`/contact`	Gauteng HQ and Harare Branch hubs, direct phone links (+27 73 703 0213 / +263 789 068 104), real-time CAD estimator, and lead form.	Local Schema.org structured business data for SA & Zim.

2. MASTER PROMPT FOR VS CODE AI AGENT

Copy and paste this exact prompt into your AI coding assistant (Cursor, GitHub Copilot, or Claude Dev):

```
Act as an elite Principal Frontend Engineer and UI/UX Architect. We are building the production-grade, multi-page public website for ON-Eaglewings Group (on-eaglewingsgroup.com), a premier construction, engineering, finishes, and renewable energy corporation operating across South Africa and Zimbabwe. The client demands a high-end corporate aesthetic matching enterprise leaders like WBHO and JUWI—sleek, modern, dark-themed or crisp minimalist design, ultra-responsive, and performance-optimized. Tech Stack to Use: - Next.js 15 (App Router) + TypeScript + Tailwind CSS - Framer Motion for smooth, executive-level animations - Three.js / React Three Fiber for subtle interactive 3D elements - Lucide React for professional icons Please generate the complete multi-page file structure and code for the following routes: 1. app/page.tsx (Home): Dynamic Hero with "You Build, We Finish" motto, quick-stats (20+ years, dual country footprint), interactive division slider, featured projects, and global branch cards. 2. app/about/page.tsx: Company history (founded 20 years ago in South Africa by a diverse group, mother company in Zimbabwe), core mission, vision, and leadership values. 3. app/services/page.tsx & individual service dynamic routes: Detailed breakdowns for 9 key divisions. 4. app/projects/page.tsx: Filterable portfolio showcasing major works (including the O.R. Tambo Airport Fire Escape Staircase project). 5. app/contact/page.tsx: Dual-branch contact hubs with interactive forms and direct details (Gauteng: +27 73 703 0213 | Harare: +263 789 068 104).
